

I wish to inform you that not everybody in this country makes \$10 to \$20 an hour. Most barely make over minimum wage and can not afford to have one company tell us what they want us to have at their price or have nothing. America was founded on small businesses and when a very small group of people make changes to suit big corporations, they hurt them. I do not mind big groups getting some breaks, but at the expense of hurting more people than they help, NO!! Business has changed so much that now it is what will line their pockets not what will be good for the public. We have allowed this to go on because we trusted the people we put in high positions and then it turns out that they were not worth a plug nickel. Do not allow big business to take away a small privilege that a single parent, like me, can afford for my child.
